

# DIPLOMA IN NURSERY TEACHER TRAINING (NTT): DETAILS

Nursery education is fundamentally a model of human development, and an educational approach based on that model. The model has two basic principles. First, children and developing adults engage in psychological self-construction by means of interaction with their environments. Second, children, especially under the age of six, have an innate path of psychological development. Based on her observations, Montessori believed that children who are at liberty to choose and act freely within an environment prepared according to her model would act spontaneously for optimal development. This is an undergraduate education course for nursery teacher training. Preschool curriculum covered by this module helps the aspirants to foster creative teaching skills. With the study of the course, one can be qualified to sublimate their knowledge to the personal growth and cognitive development of students.

Diploma in Nursery Teacher Training program is also known by the short name of NTT course! The main aim of NTT course is to cater to the nursery (pre-primary) level teacher workforce in India. NTT students are trained in areas like child education, teaching methodology, nursery level subjects & communication. The training turns 10+2 passed students into skilled nursery teachers

Students who have passed 10+2 (any stream) from a recognized board are eligible to pursue NTT course. I recommend this teacher training course to readers who are interested in teaching at nurseries, montessories and day care centres. In short, this course suits those who want to teach pre-primary level students

Nursery teachers deal with kids who have just stepped into the world of formal education! They play a key role in molding the character, morals and habits of children! To thrive in this profession, one must have patience. Interacting with kids is not easy! It is necessary to have good communication skills to succeed in this profession

Many may think that life is easy for nursery and pre-primary teachers. But the above paragraph shows how this profession is not devoid of challenges and difficulties! Here's a list of qualities and skills required to thrive in this profession

- Patience
- Energy and enthusiasm
- Passion and liking towards teaching
- Good communication skills
- Eye for detail
- Friendly attitude
